

S. PRIYA DHARSHINI

AI & DATA SCIENCE STUDENT

+91 73055-38713 | priyadharshiniiis2007@gmail.com | linkedin.com/in/priya-dharshini-ai-ds

PROFESSIONAL SUMMARY

Aspiring AI & Data Science Engineer passionate about building intelligent applications and solving real-world problems through AI and software development. Experienced with Python, Java, SQL, HTML, CSS, and JavaScript, and continuously learning modern web technologies, cloud computing, and AI workflows.

EXPERIENCE

Global Knowledge Technologies, Bangalore

11 Jun 2025 – 17 Jun 2025

- Explored AI tools and modern engineering workflows through hands-on training and practical sessions.
- Developed an understanding of AI-driven productivity tools and their applications in engineering projects.

SK Techforge LLP, Madurai

01 Dec 2025 – 06 Dec 2025

- Worked on data preprocessing, visualization, and introductory machine learning concepts using Python.
- Applied data analysis techniques to practical datasets and real-world case studies.

Pydun Technology Pvt. Ltd., Madurai

30 May 2026 – 13 Jun 2026

- Built interactive dashboards and performed data analysis using Power BI and AI-assisted tools.
- Worked on data analytics workflows, report generation, and practical business insights using modern AI technologies.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

2024 – Present

Velammal College of Engineering and Technology, Madurai

Higher Secondary Education

2022 – 2024

Velammal Bodhi Campus, Madurai

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation – Forage
- Full Stack Development MasterClass – NoviTech R&D Pvt. Ltd.
- Machine Learning Certification
- Deep Learning Certification

PROJECTS

Road Hazard Detection System

- Developed an AI-powered road hazard detection system using YOLO for detecting potholes, cracks, and manholes.
- Built a Streamlit-based application for real-time detection and visualization.

Biomedical Waste Management & Compliance Monitoring System

- Developed a proposed AI-driven framework for digital traceability of biomedical waste, monitoring waste flow from segregation to treatment and disposal.
- Designed time-series anomaly detection for incinerator operating parameters and process-integrity monitoring to identify abnormal treatment cycles.

SKILLS

- Programming: Python, Java, SQL, React, HTML, CSS, JavaScript, Node.js
- AI & Automation: LangGraph, LangChain, n8n, Flowise, Prompt Engineering, KNIME, AI Tools, Automation
- Machine Learning: Pandas, Scikit-learn, Streamlit, Tensor Flow
- Data Analytics: Tableau, Power BI
- Database: PostgreSQL, Supabase
- Tools & Platforms: Git, GitHub
- UI/UX: Figma
